

Q 9:

Command	Meaning	When to Use
git clone	Creates a copy of a remote GitHub repository on your local computer.	Use when downloading a repository for the first time.
git fetch	Downloads the latest changes from the remote repository without merging them into your current branch.	Use when you want to review changes before merging.
git pull	Downloads the latest changes from the remote repository and automatically merges them into your current branch.	Use when you want to update your local repository with the latest changes.
